UPDATED 12:55 PM -- BAIT ! ! ! USS Abraham Lincoln Moved Within Range of Iran Missiles; NO DESTROYER ESCORTS

HAL TURNER | WORLD | JULY 10, 2026 | HITS: 34409

The USS Abraham Lincoln Aircraft Carrier has been moved to within 250 kilometers of Iran's coastline and Hypersonic, anti-ship missiles -- with NO DESTROYER ESCORTS to protect it.

The map below shows the approximate location of the aircraft carrier:

EN

The most obvious reason is that the US is "Baiting" Iran to attack - and maybe even SINK - our Ship!

If the U.S. loses an aircraft carrier, Congress will declare war on Iran, and Americans will go fight . . . to secure Israel. Which is what the goal has been since Israel committed a sneak attack upon Iran at the end of February.

Israel starts a fight with a neighbor they cannot defeat, then gets the USA to wage the fight with American Blood and Treasure, while the Israelis sit back and laugh at the stupid Goyim dying for Israel.

UPDATED 12:55 PM EDT --

I have just been informed that a SECOND Aircraft Carrier, the USS George H.W. Bush (our newest carrier) has now taken up a position even CLOSER to Iran's coastline: 170 kilometers from Iran's hypersonic anti-ship missiles.

The George HW Bush is escorted by two (2) Destroyers.

EN

There are abut five-thousand Sailors and Marines on EACH of those two aircraft carriers. 10,000 men in total . . . apparently being used as BAIT.
